105 n Arbor Drive, Ormond Beach, Florida

### SKILLS

JavaScript / TypeScript

React / Next.js / React Native

Angular / Vue.js / Svelte

Node / Express / Nest.js

Python / Django / FastAPI

GraphQL / Apollo

MUI / Tailwind CSS / Chakra UI

Automatic Testing

MySQL / PostgreSQL / MongoDB

AWS / Firebase

### EDUCATION

Bachelor's Degree in Computer Science

Keiser University

2015 - 2017

ML/AI & Web Development Area

### PROFILE

With 6+ years of experience in web development, I always try to produce high-quality code which is testable and scalable. In the last 3 years of my career, I mainly focused on JavaScript frameworks and I built a number of websites for both startup and large enterprise-level companies.

### WORK EXPERIENCE

#### Front-End Developer

CodeBright

Mar 2020 - Current

- Built PWA for machine marketing & e-commerce website using **React**, **TypeScript**, **MUI**, and **GraphQL**.
- Integrated **GraphQL** APIs into the front-end project.
- Integrated **Mixpanel** to analyze data on user activities.
- Used **Chart.js** for sales data visualization.
- Worked directly with the design team to produce pixel-perfect, responsive pages.
- Covered 75% of automation testing following **TDD**.
- Strongly experienced in daily code review and feature reviews on the product roadmap.
- Set up a **storybook** and built UI component libraries for global use following good code standards.

#### Full-Stack Developer

ResultID

Apr 2018 - Feb 2020

- Built admin dashboard site for the machine-marketing website using **React**, **TypeScript**, **Chakra UI**, **Node.js** and **PostgreSQL**.
- Participated in the development from scratch and contributed my unique ideas to the planning and architecture.
- Conducted unit testing using **Jest** and **testing-library**.
- Implemented **SSR** and **SSG** on the front-end projects to increase **SEO** and initial page loading speed using **Next.js**.
- Used third-party libraries **@reduxjs/toolkit** to manage the store.
- Maintained backend code built with **Node.js**, **PostgreSQL** and collaborated with product team to implement new features.
- Built the file storage APIs using **AWS S3**.
- Developed **RESTful APIs** and defined **OpenAPI** schemas, generated specifications using manipulating **Django REST Framework** features.

#### Full-Stack Developer

Manex

Feb 2017 - Apr 2018

- Worked with agile team to migrate legacy **PHP/Laravel** project to **MERN + TypeScript** project.
- Migrated old codebases with **jQuery** to **React** to improve performance.
- Mocked static web pages using **HTML**, **CSS**, **jQuery** and **React**.
- Architected, designed and developed MVP of e-commerce website using **React + Bootstrap + Node.js**.
- Translated **Figma** designs into responsive & pixel-perfect pages using **React + Bootstrap**.
- Had peer code reviews to improve code quality and follow best practices.
